Register today for the Enterprise Data World conference in San Diego, CA from April 28th - May 2nd.

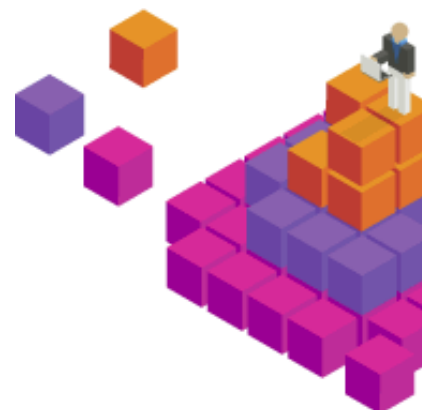

IBM loves data!

Learn how to get more value from your data at Enterprise Data World.

The business world's most comprehensive data and information management education event is right around the corner! Join IBM for Enterprise Data World, an educational conference that teaches all the latest insights you need to know about data technology, from April 28th to May 2nd.

You'll get cutting-edge training on Big Data, Cloud-based services, real-time analytics, unstructured data management, social data, data science, predictive modeling, Hadoop and more. Or, build your skills!

Enterprise Data World will engage you in a variety of events, including keynotes, workshops, tutorials, case studies, and discussions. Visit the IBM expo booth for an opportunity to talk one-on-one with IBM experts. They can walk you through IBM Information Management and explain how it can help you gain more value from your data.

IBM Speaking session info

David Corrigan

Topic: "Information Governance in the era of Big Data"

Tuesday, April 30th

11:20 am - 12:10 pm

David Corrigan is currently the Director of Product Marketing for IBM's InfoSphere portfolio, which is focused on managing Trusted Information. His primary focus is driving the messaging and strategy for the InfoSphere portfolio of information integration, data quality, master data management, data lifecycle management, and data privacy and security capabilities. Prior to his current role, David has led the product management and product marketing teams for Master Data Management (MDM), and has worked in the Information Management space for over 12 years. David holds an MBA from York University's Schulich School of Business, and an undergraduate degree from the University of Toronto

James Kobielus, Big Data Evangelist

Topic: "Data Scientists: Grow and Sustain a Big Data Center of Excellence"

Wednesday, May 1st

11:30 am - 12:20 pm

About the speaker: James Kobielus is an industry veteran and serves as IBM's big data evangelist. He spearheads IBM's thought leadership activities in Big Data, Hadoop, enterprise data warehousing, advanced analytics, business intelligence, data management, and next best action technologies. He works with IBM's product management and marketing teams in Big Data.
